HIGH PERFORMANCE PARTS

HP CARBON ENGINE SPOILER

UNIQUE COMPONENTS FOR UNIQUE INDIVIDUALS

Exclusive components that make any machine unique. That's what High Performance is all about. It is the result of a constant quest for perfection, involving the finest materials – carbon, titanium and aluminium – and the most sophisticated manufacturing techniques – weaving, casting and milling. And as a result, High Performance Parts offer the perfect symbiosis of form and function, combining light-

ness and strength to incredible effect. Carbon, with its distinctive visible weave structure, and aluminium parts milled from a single block of metal give your bike a unique look.

These components make any motorcycle an object of desire, and ensure riders turn heads, everywhere they go.

HP FORGED WHEELS

IMPROVING ON PERFECTION.

How can you make your ideal motorcycle even better? By adding High Performance components. This is technology that is at the absolute leading edge of innovation, fresh out of the lab and straight onto the road – via the racetrack.

It has been tested, and proven to be an upgrade on anything that came before.

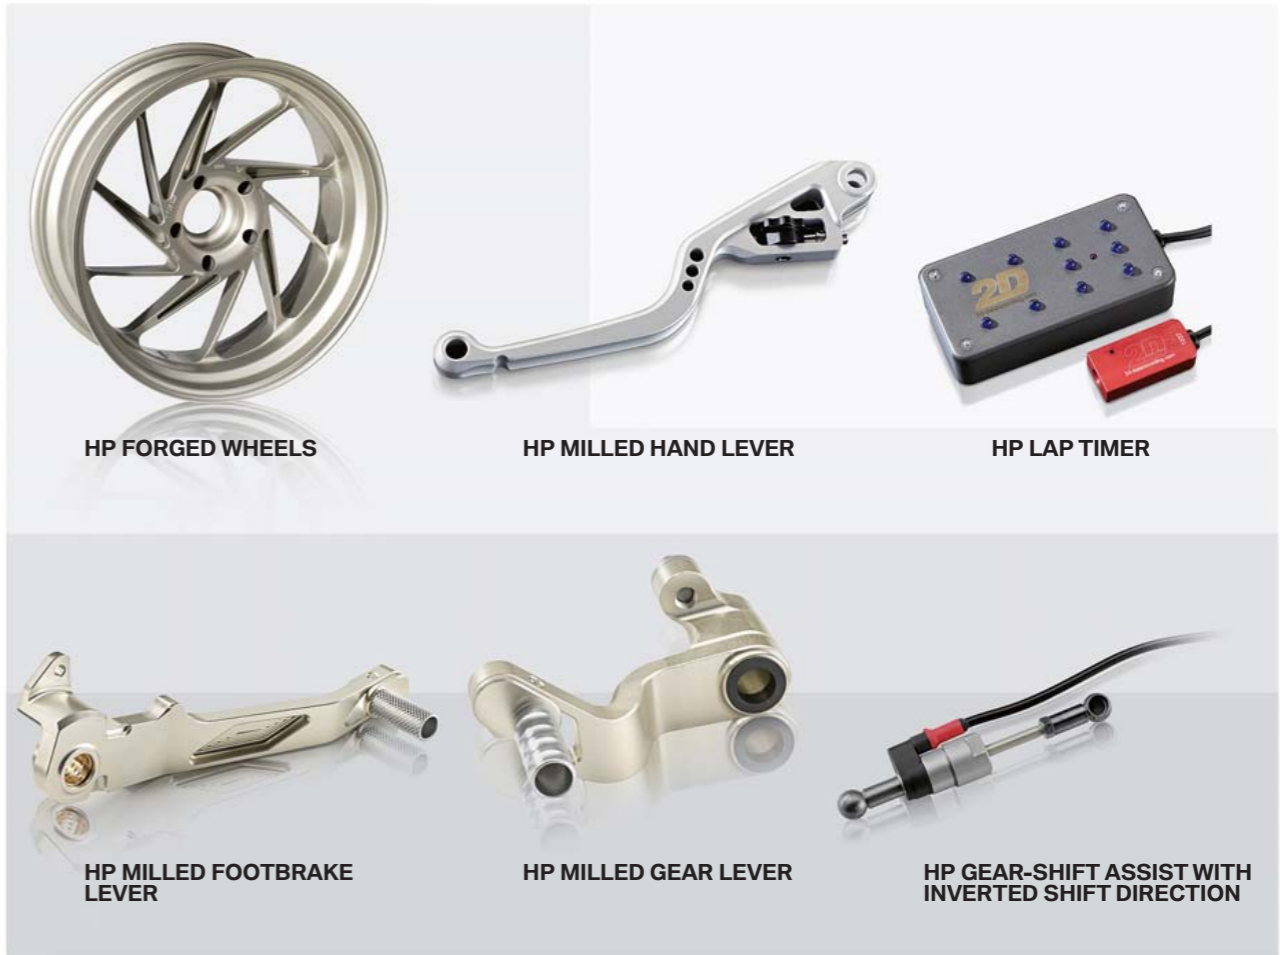

Prepare to be excited.

SUPERSPORT COMPONENTS.

Meet the S 1000 RR. The first supersport bike that's also a BMW. A motorcycle that sets a new benchmark in performance – and in looks.

The carbon components for the S 1000 RR come straight from the racetrack. There, per-

formance is everything. So they're perfect for this motorcycle. And the same goes for the lap timer, aluminium clutch and brake levers, foot pegs and gear-shift assist. Helping to keep the S 1000 RR even further ahead of the pack.

HP CARBON SEAT HUMP COVER

S 1000 RR

GOING ALL-OUT ON THE RACETRACK.

Competition riding requires ultimate performance. The difference between winning and losing is measured in hundredths of a second. And High Performance Race Parts like the 100% titanium Akrapovič exhaust system and a range of other racing accessories can give you the vital edge. This is equipment made by professionals for professionals to get your S 1000 RR in perfect shape for racetrack. So uncompromising that it's not even street-legal.

HP LABEL

HP RACE SHIFT DIRECTION INVERSION

- For more intuitive gear shift movements
- Enables faster upshifts
- Can be used in conjunction with HP gear-shift assist, HP foot pegs and standard foot pegs

HP RACE COVER KIT

- Covers to replace mountings for mirrors, indicators and number plate holder when these are removed for racing

HP RACE CALIBRATION KIT

- Complements the HP race power kit
- Software tool to individually calibrate engine management and DTC settings (fuel injection, ignition, traction control, HP gear-shift assist, pit lane speed limit, and master reset)
- Enables engine performance and traction to be customized to professional standards

HP RACE POWER KIT

- Open Akrapovič titanium racing exhaust system and racing engine management chip
- Improves performance primarily in mid rev range
- Optimizes acceleration and traction for each riding mode (Rain, Sport, Race, Slick)

HP RACE RIGHT FOOT PEG

- In conjunction with Akrapovič racing exhaust system
- Reduces weight by removing connection to standard or homologated Akrapovič silencer

HP RACE DATA LOGGER (not shown)

- Displays and analyses data to improve performance using the HP race power kit and HP race calibration kit
- Includes software and USB interface
- Data recorded includes speed, revs, throttle position, front and rear brake status, gear, longitudinal acceleration, lean angle, engine temperature, GPS position and GPS speed
- Available from 2011

POWERFUL COMPONENTS.

Smooth and responsive, BMW Motorrad in-line four-cylinder models have got what it takes to make the heart beat faster. But with High Performance Parts, they'll send it into overdrive.

It doesn't get any better than this: a carbon engine spoiler, carbon covers for the seat and airbox, forged wheels and aluminium footpegs. The K-Series with High Performance components – a thrill that takes the breath away.

HIGH-IMPACT COMPONENTS.

Boxer engines have a distinctive identity, and this shapes the feel of the whole bike.

They are full-blooded, powerful and cool. And these characteristics are further underlined by the components in the High Performance range. All of them have been specifically developed for the individual model in question. From

carbon trims to forged aluminium wheels, they fit seamlessly into the overall design. For a unique effect that you can feel on the racetrack, on the road – and in the goosebumps on your skin.

HP CARBON PRODUCT DESCRIPTIONS

HP CARBON REAR MUDGUARD

Gives the bike a more dynamic and distinctive look. With a brilliant high-quality UV-resistant lacquer finish.

HP CARBON FRONT MUDGUARD

Replaces the standard mudguard and emphasizes the dynamic looks of the motorcycle.

HP CARBON ENGINE SPOILER

Replaces the standard radiator trim. Highly impact-resistant, with a brilliant UV-resistant lacquer finish.

HP CARBON ENGINE COVER

Its visible carbon fibre weave and brilliant UV-resistant lacquer enhance the looks of the motorcycle.

HP CARBON SEAT HUMP COVER

Covers the pillion seat for improved aerodynamic performance. The result is a dynamic, single-seater look.

HP CARBON BADGE MOUNTING KIT

Replaces standard plastic badge mounting. An exclusive detail that adds an extra touch of style.

HP CARBON SEAT COVER

Extremely tough, and finished in a brilliant lacquer that gives an enhanced sense of depth to the weave of the carbon fibre.

HP CARBON CLUTCH COVER TRIM

Weighs just 60 grams (approx.), and makes a significant visual impact with its large surface area.

HP CARBON CLUTCH TRIM

Stylish and impact-resistant. The new brilliant UV-resistant lacquer gives it a deeper lustre.

HP CARBON HEAT PROTECTOR FOR STANDARD SILENCER

Replaces the standard trim at the join of the exhaust manifold and silencer. For enhanced looks and reduced weight.

HP CARBON WINDSHIELD

Stylish looks. Scratch and shatter-proof. Guaranteed to attract admiring glances even when travelling at speed.

HP CARBON AIR INTAKE

Enhances the looks of the bike, with its brilliant UV-resistant lacquer finish.

HP CARBON AIRBOX COVER

Extremely robust, for enhanced looks and lower overall weight.

HP CARBON REAR SPLASH PROTECTOR

Despite weighing just 250 grams (approx.), it is extremely robust, thanks to its carbon and carbon/Kevlar hybrid weave. With brilliant UV-resistant lacquer.

HP CARBON HEEL GUARD (LEFT/RIGHT)

Enhances the looks of the bike, and protects against scuffing by boots. Only available in conjunction with the standard foot pegs.

HP CARBON CHAIN GUARD

Replaces standard plastic chain guard. A stylish detail that gives the bike a highly distinctive look.

HP CARBON COCKPIT INTERIOR PANELS

Finished in a brilliant UV-resistant lacquer that gives an added sense of depth to the weave of the carbon fibre. The result is a highly striking look.

HP CARBON TANK TRIM KIT

Enhances the looks of the motorcycle, with the brilliant UV-resistant lacquer giving a deeper lustre.

HP CARBON SILENCER COVER

Replaces the standard cover, for a track-inspired look. Not compatible with the sport silencer.

HP PRODUCT DESCRIPTIONS

HP FORGED WHEELS

For improved handling and more involving feedback from the suspension. May be fitted in conjunction with TPC.

HP GEAR-SHIFT ASSIST

Enables faster upshifts without throttle release or use of clutch. For HP foot pegs. Homologated for road use.

HP GEAR-SHIFT ASSIST WITH INVERTED SHIFT DIRECTION

Enables faster upshifts without throttle release or use of clutch, and with more intuitive shift movements. For HP foot pegs. Homologated for road use.

HP MILLED HAND LEVER

Fully adjustable, high-quality CNC-milled aluminium brake and/or clutch lever. Enhances the look of the bike.

HP MILLED GEAR LEVER

Made from a high-quality aluminium alloy, it adds an extra touch of style to the bike. Steplessly adjustable to suit the individual rider.

HP RIDER FOOT PEGS

Made of milled aluminium, adjustable between six positions, and compatible with shift direction inversion for racing use. Enhance both looks and functionality.

HP PILLION PASSENGER FOOT PEGS

Made of forged aluminium and stainless steel. Both foot pegs fold away. No need to amend registration documents.

HP INSTRUMENT CLUSTER

Makes your machine ready for the racetrack. With a variety of settings and additional functions, including extremely accurate lap timing.

ADDITIONAL CONTROLS FOR HP INSTRUMENT CLUSTER

For operating the HP instrument cluster. Two buttons ("Menu" and "Set") for the left-hand handlebar grip.

HP LAP TIMER

Compatible with HP instrument cluster. Automatically records lap times. For increased comfort and safety. Transmitter and receiver available separately.
