When purchasing a generator, it's important that you select one that's capable of meeting your energy requirements. You need to match the rated output of the generator to the maximum anticipated power to be used. See the chart below for a general guideline. Please visit the Generator Tips & Links section at yamaha-motor.ca for a more detailed explanation on calculating your energy needs.

	Jigsaw	Circular Saw	Table Saw	Chain Saw	Disc Grinder	Electric Weed Trimmer	Power Hand Drill	Electric Welder (100 Amps)	Shop Vacuum	Air Compressor (1/2 Horsepower)	Air Compressor (1 Horsepower)	Air Compressor (1 1/2 Horsepower)	Refrigerator or Freezer	Sump Pump (1/2 horsepower)	Electric Range Oven
Approx. Running Wattage	300	800 1800	1500 1800	900	2000	500	350 600	3600	900	1000	1500	2200	700	1050	2100

Generator Covers

We offer a variety of covers to protect your generator when not in use. Made from premium SurLast polyester fabric, this UV-resistant material fights fading while protecting your equipment from the elements. A special urethane coating lets moisture escape from underneath while remaining water repellent. Covers are mold, mildew, tear and abrasion resistant to ensure durability. Starting from \$26.95, these covers are designed to protect your investment.
